

RESULTS OF GROUP CRITIQUE

Name of graph author: Elisa

The purpose of this graph is:

To show the composition of classes and individuals and families that embarked from each port by port of departure

Brief description of the graph (use graph grammar):

stacked graph that divides between the embarked city. Then it divides by class. Then divides between individuals or families

The three most important critique points are:

- ~~The~~ Inversion of legend to match the colors on the graph
- The Recode image showed the unknowns but when the image was saved that was lost.
- the bright colors draws your eye
- The title is capitalized

CRITIQUE NOTES

Name of person being reviewed: _____

~~ADDIE~~ FLISA

Is this a self-review? (circle one): yes / no

Layering and separation. Does the submission effectively use layering and separation to distinguish the data representations from supporting elements of the graph? Is the eye drawn to what matters most?

Graphical perception. Is the typical consumer of the graph able to easily and accurately perceive the data?

Color and aesthetics. Is the use of color (if applicable) effective? Is the graph designed well?

Documentation and presentation. Is the image of high quality and without distortions? Does the image include sufficient documentation? Is everything spelled correctly and grammatically correct?

Notes and Feedback:

- PERHAPS I COULD READ BETTER IF THE "FAMILY" COLORS WERE RELATED AND "INDIVIDUAL" WERE AS WELL BECAUSE I KEEP HAVING TO FLIP TO LEGEND.
- COLOR CONTRAST (IN HUE) MIGHT HELP
- # OF PASSENGERS IS CLEAR BUT I SOMETIMES HAVE TROUBLE READING STACKED GRAPHS.

Overall effectiveness of this graph (circle one):

1 2 3 4 5 6 7 8 9 10
ineffective

6

extremely effective

Notes and Feedback:

layering & separation.
good separation.

colors. great colors. blues and green
mix in for me.
reverse order of legend

shows the message of the graph.

Overall effectiveness of this graph (circle one):

1 2 3 4 5 6 7 8 9 10
ineffective extremely effective

Documentation and presentation. Is the image of high quality and without distortions? Does the image include sufficient documentation? Is everything spelled correctly and grammatically correct?

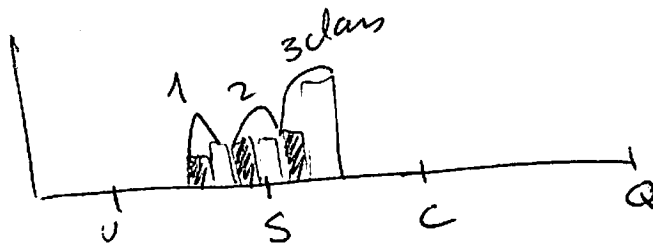

Notes and Feedback:

The hues of the colors are great, but greens and blues are very close. Make them more contrasting

the colors on the legend should be the same order as on the bars

Perhaps the table is redundant!

Why not do the ~~graphs~~ bars next to each other

No vertical lines needed on the background.
Put the unknown to the right.

Overall effectiveness of this graph (circle one):

1 2 3 4 5 6 7 8 9 10
ineffective

Notes and Feedback:

I like how the title is capitalized and then the descriptive text is lower case.

I think this might be saying a little too much

Overall effectiveness of this graph (circle one):

1 2
ineffective

8 9 10
extremely effective
